

CITY OF STOCKTON – PUBLIC WORKS DEPARTMENT
PROFESSIONAL TRAFFIC COUNTS COLLECTION SERVICES
PROJECT NO. SEB-23-004
QUESTIONS AND ANSWERS

Q1. Our team has a question relating to the bid requirements for the subject RFP. Are prevailing wages required for this? They don't typically apply to any traffic data collection contracts in CA, as there's not an applicable job role that applies to the work we perform. This might only apply to the engineering side of the work, but we want to check to be sure.

Ans: Please refer to the Instructions to Proposers, page 1, item 3, paragraph 2.

Q2. Can you please verify that the 130 counts and their corresponding TI map updates are the only guaranteed task order items as part of this agreement?

Ans: As indicated in Attachment A, the quantity is an estimate as it can fluctuate based on the requests.

Q3. What sections of the proposal are considered "technical" and must adhere to the 10-page limit?

Ans: Please refer to the RFP Section 6 which indicate the sections that are included as body of proposal.

Q4. Work experience looks to be required in both the Project Team section and Examples section. Can we keep all of the similar experience in the Examples section to save some space?

Ans: Yes, however, it should be reflected in both sections, but a more in-depth description can be provided in one section.

Q5. Would you all be interested in a SaaS product as part of this bid to manage and display the data collected from traffic counts, in place of or to supplement the TI map creation?

Ans: At this time, staff is only looking for services as indicated in the RFP.
