

**Mormon Slough Restoration and Beautification, Phase 1: Remediation Plan
City Project No. WB24040**

EVALUATION SCORING WORKSHEET

Proposals will be selected using a “best value” methodology based on the following categories and out of a possible 100-point total:

<p>Detailed Work Plan (35 points)</p>	<p>Firm’s ability to provide professional engineering and environmental consulting services as defined in the Scope of Services (Section 4.0) and ability to effectively assess the project area.</p> <p>Firm’s proposed Detailed Work Plan (Section 6.6), including a clearly defined plan for research development and implementation of the prescribed program. Any alternative or additional approaches to the project design.</p> <p>Firm’s selected team and their expertise.</p>
<p>Cost Proposal (30 points)</p>	<p>Points will be weighted with regard to the fee most favorable to the City, with all other categories considered first.</p>
<p>Experience and References (25 points)</p>	<p>Experience in providing consulting services for projects similar in scope and size. Firm’s references and current/past relationship with the City.</p>
<p>Schedule (5 points)</p>	<p>Effectiveness, clarity and practicality of the schedule provided, describing the time required to complete each task in the scope.</p>
<p>Local Business Preference (5 points)</p>	<p>Local business preference applies as defined by Stockton Municipal Code 3.68.090. A maximum of 5 points will be given for firms with offices in Stockton, and a maximum of 2 points will be given for firms with offices outside of Stockton but within San Joaquin County.</p>
